Work History

Software Engineer @ [SocialJoey.com](#)

August 2017 - Present / Remote

- Transitioned from bobwaycott.com and continued to work on the same application in a greater capacity
- Worked with one other developer to rebuild the entire application from the ground up
- Added new features to existing application, such as monthly report browsing and generation
- Redesigned the application and the architecture in order to allow clients to log into the platform
- Rebuilt the company directory and added new features to help manage users
- Added other features, such as a content library for franchises and franchisees
- Troubleshooting, bug squashing, etc.

Web Application Developer @ bobwaycott.com

January 2017 - August 2017 / Remote

- Primarily worked on a project for Bob Waycott's client, Social Joey (socialjoey.com).
- Maintained and updated a large-scale application used for social media content creation, curation, and publication across multiple social media networks for Social Joey's vast clientele.
- Used Python, Flask, Jinja2, Javascript, SASS, HTML, CSS, SQLAlchemy, PostgreSQL, Gulp, etc.
- Added new social media channel and content type to the application, which included creating the models and views, upgrading the database, and modifying the reports found in user dashboards.

Senior Teaching Specialist & Coordinator of First-Year French @ University of Minnesota

August 2007 - August 2017 / Minneapolis, MN

- Trained, supervised, observed, evaluated, and mentored around 15 French Instructors each semester.
- Taught 2 sections of French courses each semester to a total of about 50 students per semester.
- Led meetings, provided resources for instructors.
- Advised and mediated between instructors and students as needed.
- Created custom web sites for faculty-created reading activities.
- Created custom online activities to accompany the online workbook.
- Created and managed Moodle course sites.

Digital Faculty Consultant & Subject-Matter Expert @ McGraw-Hill

April 2012 - Present / Remote

- Created digital versions of paper workbook activities for the online platform, Connect.
- Created content for the proprietary online study tool, LearnSmart.
- Provided technical training and new-user onboarding in both in-person workshops and online webinars on best practices for using McGraw-Hill's online tools.

Other Web Development Experience

- Created two websites at the University of Minnesota containing reading materials, as well as activities for students, which were used by French faculty across the nation.
- Created a personal website for a local musician.
- Helped design and maintain the website for Sojourn Campus Church in Minneapolis.
- Built and maintained a personal Wordpress blog.
- Regularly created custom sites, forms, and learning-focused online learning experiences as part of my educational activities over the last 12 years.
